Reissue Applications

DETAILED ACTION

Claim Objections

1. Claims 1, 18, 21, and 34-64 are objected to because of the following informalities:

- In claims 1, 18, and 21, the matter to be omitted by reissue must be enclosed in brackets, not strike through.
- The matter to be added by reissue in claims 34-64 must be underlined.

See 37 CFR 1.173(b). Appropriate correction is required.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2821

3. Claims 1-3, 6-12, 17, 21, 22, 28-47, and 51 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-9, 15-22, 34, and 35 of copending Application No. 10/956,565. Although the conflicting claims are not identical, they are not patentably distinct from each other because they commonly comprise an antenna element made from a triangular shaped sheet of conductive material having a height and a base dimension, wherein the conductive material has a rolled shape such that the antenna has the height of the conductive material, a number of turns having spacing between them and a base diameter, a ground plate spaced from the base of the antenna, a feed point located to the base of the antenna,...

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

4. Claims 18-20 are allowed.
5. Claims 4, 5, 13-16, 23-27, 48-50, 52-64 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
